Summary and Goals

A calm and organized individual with a strong interest in 3D graphics, programming, and game development. I have experience using tools such as Blender and Unity to express my creativity in both personal and academic projects. I view a potential job as an opportunity to grow both professionally and personally. I always strive to challenge myself and learn from the experiences I encounter along the way.

Work experience

Summer 2022, 2023 and 2024

Warehouse work/forklift driver • Summer job • Job&talent / Stadium

I worked as a forklift driver at Stadium's warehouse, where my tasks included picking and packaging goods that would later be sent to stores in the Nordic region. I received a lot of praise for both my accuracy and for the high pace I was able to maintain.

Summers 2016, 2017, 2020 and 2021 | also about 6 months in 2019

Home care • Summer jobs • Valdemarsvik municipality

I had to take on a lot of responsibility in the work, especially considering that it's about people. My tasks involved helping and supporting the elderly with everything from household chores to sharing medicine. I had to be confident in my independence, as I often worked alone. This situation forced me to develop my problem-solving skills under pressure. I gained valuable experience in the service profession and also learned how to act in serious situations, such as accidents. I received a lot of praise from the users for my niceness and my service thinking.

Summer 2018

Caretaker • Permanent employment • Toles Maskin & Entreprenad

I was entrusted, together with a colleague from the company, to be responsible for the maintenance of a privately owned castle just outside Norrköping. My tasks mainly included gardening, but I also sometimes worked with the castle's water facilities. During a two-week period, I also had the opportunity to lead young people who had

summer jobs, which gave me valuable experience in work management. My accuracy and versatility were really appreciated in the work.

Summer 2015

Caretaker • Summer job • Valdemarsvik street office

I worked a lot in groups where our main tasks consisted of clearing bushes, hedges and flower beds in Valdemarsvik municipality. In addition to this, we also had other tasks, such as lawn mowing, trimming, tree pruning and cleaning of streets and squares.

Education

Natural Science Programme, Nyströmska School, Söderköping

(*Graduated*) It is an education at the upper secondary level that focuses on natural science subjects and aims to give students a deeper insight into mathematics, physics, chemistry and biology. The program is designed to prepare students for further studies in science and technology.

Master of Science in Media Technology, Linköping University, Norrköping

(*Ongoing education*)

This is a Master of Science in Engineering programme at Linköping University with a focus on computer graphics, programming and visualisation. The programme provides a solid foundation in technology and programming, particularly in system development in areas such as 3D graphics, image processing and game development. Through hands-on projects and the use of agile development methods, students not only improve their technical skills, but also gain experience in group work and project management. More information about the training can be found here: <https://studieinfo.liu.se/program/6CMEN/5712>.

Computer Skills

My computer skills I would say are relatively good. Have many years of experience in many different software programs. Some of these are:

- Blender
- Visual Studio/ Visual Studio Code
- Unity
- Versioning tool "Github"
- Overleaf
- Photoshop
- Matlab
- Adobe Premiere Pro
- Microsoft Office

CV (English)

Language skills

Swedish – very good oral and written skills (mother tongue). English – good oral and written skills.
